

Introducing the Auragen of the computer species.

**Now a higher form of computer technology has evolved.
It combines fault tolerance, high performance and ease of use.
The natural selection for your business transaction needs.**

Now you can have fault tolerant applications at price/performance levels never available before. For under \$138,000, our entry level 2-Cluster system provides up to twice the performance of today's fault tolerant systems.

AURAGEN™ begins with an advanced 32-bit distributed architecture. Both your professional and end-user staff will find it easy to learn and use. AUROS™, our operating system based on UNIX™, is enhanced with performance, security, privacy and recovery capabilities specifically tailored for the transaction market. We provide ANSI 74 High Level COBOL, FORTRAN 77, Pascal, C and even business BASIC that run fully fault tolerant. No special instructions are necessary. No reprogramming. No retraining. No added expense.

We also provide a full range of interactive productivity tools for programmers, including AURAGEN's full-function relational DBMS and Transaction Processing Management System. Then we've added menus, help facilities, and an English-like query language to make your staff more productive. The extensive communications packages that we provide include SNA, BSC, X.25 and more.

The concept that sets us above and apart from all other fault tolerant systems is simple. Our fault tolerance is totally transparent and is so efficient you'll never want to turn it off. Our backup hardware is available to do productive work during normal operations. No downtime. No manual backup procedures. No added expense.

With AURAGEN's distributed design, you can grow in precisely controlled increments. The basic fault tolerant system contains two Clusters. Each Cluster contains several tightly coupled MC68000 processors. Separate processors handle fault tolerance, user programs, communications, and database functions. The system can be expanded to 32 Clusters.

AURAGEN is so advanced, you'd select our system even if we didn't provide fault tolerance.

But we do. In today's competitive business environment, you need every survival factor working for you. We provide them all. And we want to tell you more about them. That's why we invite you to ask for more information.
